

**Estuary Restoration Act
Estuary Habitat Restoration Council
Ranked Proposal Recommendation
February 13, 2007**

Project	Area/Habitat /Key Action
1. Old Place Creek Berm Removal Project, NY	Approximately 25 acres of tidal wetland habitat through removal of an earthen berm restoring tidal connection.
2. Banana River Estuary Restoration Project, FL	4.8 acres of forested wetland through removal of exotics and planting native species such as mangroves.
3. Fort Sheridan Coastal Habitat Restoration Project, IL	30 acres of forested ravine with a rare community of relict northern range plant assemblages through stabilization, removal of invasives and planting native herbaceous ground cover.
4. Euclid Creek Estuary Habitat Restoration, OH	5 acres of wetland by recontouring a relict oxbow to provide nursery areas for young of the year fishes and “drown out” invasive plant species.
