

US Army Corps
of Engineers ®

SWD

Lessons Learned

Sustain:

- Continue extensive communications with the public, agencies, and other organizations using multiple methods
 - 12 Points #9: Effectively Communicate Risk - Integrate effective communication of risk and reliability concepts...
- Communications with vertical team
 - 12 Points #3: Continuously Reassess Policy, Planning Guidance - Review and refresh planning guidance and engineering standards at a greater frequency...

Improve:

- Write the report throughout the formulation process
 - 12 Points #1: Employ Integrated, Comprehensive and Systems-Based Approach – A systems approach will be used in conjunction with all partners to facilitate collaborative planning
- Document all analyses clearly and report residual risk
 - 12 Points #2: Employ Risk-Based Concepts – Identify residual risk, plan, design and communicate accordingly

One Corps Serving The Army and the Nation
